

FileTransferCommand

```
classDiagram
    class FileTransferCommand
    class RsyncCommand
    class ScpCommand
    RsyncCommand --|> FileTransferCommand
    ScpCommand --|> FileTransferCommand
```

The diagram illustrates a class hierarchy. At the top is the 'FileTransferCommand' class. Below it are two subclasses: 'RsyncCommand' on the left and 'ScpCommand' on the right. A horizontal line connects the two subclasses, with a vertical arrow pointing upwards from the center of this line to the 'FileTransferCommand' box, indicating that both 'RsyncCommand' and 'ScpCommand' inherit from 'FileTransferCommand'.

RsyncCommand
